Re: Public Docket A-90-16
Air Docket LE-131

Dear Ms. Smith:

On behalf of Indiana Farm Bureau Cooperative Association, Inc., we would like to comment upon the proposal by Ethyl Canada, Inc., in regard to the use of its product (Ethyl Hi Tec 3000) in the United States.

We feel that the product should be allowed distribution in this country as it will lower reformer severity, thus enabling us to reduce the aromatic content of gasoline that we refine at our Evansville refinery.

We are a small refinery (less than 25,000 barrels) and anything that would help us to lower aromatic content without making substantial engineering changes would be greatly appreciated.

In light of the recent amendments to the Clean Air Act, we think that this application by Ethyl Canada, Inc. is timely and should be given favorable consideration.

Yours truly,

INDIANA FARM BUREAU COOPERATIVE ASSOCIATION, INC.

Robert J. DeLambo
